

All of our rails are solid brass or stainless steel and available in several different finishes.

Elevator rails are available surface mounted or through bolted. Please specify when ordering.

We manufacture these rails to your specifications. They are available in all lengths and any center to center measurement between brackets.

The lead time on all rails is 3 - 10 days depending on finishes.

Our machine shop and metal manufacturing plant also allow us to offer custom fabricated rails to your specifications. Please call for additional info.
